

### Choose U•Konserve Waste-Free Food Packing this Holiday Season!

Eat healthier this holiday season, *and* eliminate waste generated by single-use disposable containers. Select a waste-free food-storing system that promotes better health for one's family and the planet.

U•Konserve, a product line from Kids Konserve®, offers new durable and leak-proof stainless steel containers as alternatives to single-use disposable containers used for takeout, salad bars, refrigerator storage and more. The newest products come in a leak-proof three-piece nesting set (below left, MSRP: \$45), as well as a single leak-proof To-Go version (below right, MSRP: \$22).

### With the holiday season fast approaching, there are many reasons to switch:

- Store leftover holiday meals in large dishwasher-safe, leak-proof containers.
- Bring takeout or doggie bags home in reusable containers instead of single-use disposables.
- Carry on-the-go snacks and meals for the whole family during holiday travel.
- Give the sleek, modern containers as a unique and practical gift.
- Plan next year's resolution for better health by packing lunch in non-toxic and non-leaching containers.
- Swap out older plastic kitchen storage containers for dishwasher-safe, non-leaching containers.
- De-clutter kitchen cabinets with nesting containers, which easily fit inside one another.

- Transport homemade baked goods to events and dinners in this waste-free alternative.

You can find more information about the U•Konserve Square Leak-Proof Nesting Trio and To-Go Leak-Proof Container in the latest press release [here](#).
