FOR IMMEDIATE RELEASE – February 19, 2016

U-Konserve® Introduces New Divided Container Series

SCOTTSDALE, AZ (February 19, 2016)—U-Konserve, a pioneer provider of reusable lunch-packing and food-storage products, announced today their New Divided Container Series available in March. The new sustainably designed line supports the company’s commitment to provide the entire family with durable and non-toxic waste-free solutions. Their new collection of 17 products also includes best-selling standouts now available in their most popular colors and new versatile sizes:

- **New Divided Containers**—removable bento-style sections help with healthy portion control, balanced meals and separate food for picky eaters
- **New Color Options**—their trusted and most popular leak-proof containers, food wraps, snack bags and glass/silicone bottles now in vibrant, complementary colors
- **New Plastic-Free Container**—a larger version of their popular all-stainless mini container

“Our new divided series of leak-proof stainless steel containers allows us to expand upon the products our customers have come to know and trust. By adding removable dividers our containers transform into bento-style solutions with multiple functions, giving our customers two containers in one,” says Chance Claxton, U-Konserve’s Co-Founder.

About U-Konserve®

U-Konserve offers quality, safe and reusable food-storage solutions for the whole family. Products include leak-proof stainless steel containers, glass/silicone containers and bottles, recycled lunch totes, reusable snack bags and wraps, and waste-free accessories. The products make ideal food storage for school lunches, work, travel, picnics, takeout and family leftovers. U-Konserve is a certified B Corporation and a member of 1% for the Planet. As a mission-driven company, they are committed to reducing waste, inspiring stewardship and operating a healthy business with integrity and responsibility.
